**Split Butterfly Valve System.**  
Bulk Solids Containers.

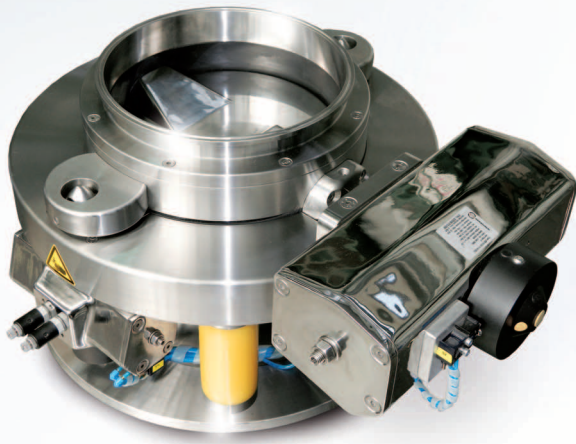

The split butterfly valve system has been incorporated into the UCON bulk solids containers. It fulfils the most stringent pharmaceutical and chemical requirements. It features hermetically sealed, contamination-free transition between container and emptying unit. The transition between container and emptying station, takes place without any contamination (dust exposure). Principal areas of application are in connection with high risk materials, contamination free and clean-room requirements in the pharmaceutical and chemical industries.

**Please do not hesitate to contact us. We look forward to handling your filling and emptying tasks!**

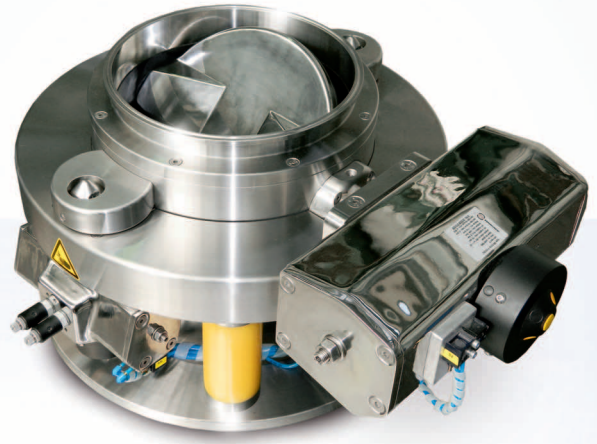

Tel.: +49 7831 77 232

- no contamination
- GMP-compliant
- FDA-compliant
- ATEX certifiable
- fully automatic control
